Thawani Oman Net Cybersource

MUSCAT: TawseelOnline and Catseye Systems and Solutions Pvt Ltd have come together to launch a unique hyperlocal e-commerce and logistics ecosystem for the Sultanate and the whole of GCC region.

This is the result of a joint venture between Overseas Treasures LLC, Muscat, and Mumbai-based Catseye Systems and Solutions Pvt Ltd.

Alok Kumar, Chief Technology Officer, OT-Oman, told the Observer that the venture would herald a supply chain revolution in the Sultanate as it is a multi-lingual roundthe-clock hyper-local platform for e-commerce and logistics, bringing its customers all they need to their doorstep.

Tawsee/Online NFC Tag Solution

NFC stands for near-field communication and it allows phones, tablets, laptops, and other devices to easily share data with other NFC-equipped devices. It evolved from radio-frequency identification (RFID) technology.RFID is behind those security scan cards that get you into the office every day or bypass that tollbooth on your morning commute

How does NFC work?

Unlike Bluetooth, NFC doesn't require any kind of manual pairing or device discovery to transfer data. With NFC, a connection is automatically started when another NFC device enters into that previously specified four-inch range. Once in range, the two devices instantly communicate and send prompts to the user. There's huge potential with NFC. Listed below are three major ways we already use NFC between devices
